

OPPORTUNITY

- Cryptocurrencies provide tremendous opportunities for systematic trading due to immature market landscape and inherent high volatility
- Growing institutional interest will inevitably increase market efficiency, driving out profit opportunities
- To remain competitive, crypto traders need to evolve and seek a totally different level of expertise, infrastructure, and resources

PRODUCT

- Fully-automated trading strategies that make money regardless of the market direction
- Intelligent and ultra-fast execution algorithms that dramatically reduce the cost of trading
- Proprietary trading signals sourced from statistical market data analysis, news and social media sentiment and on-chain activity analysis

WHY US?

- We are the team behind ATTO Trading Technologies – a high-frequency quantitative trading firm developing proprietary algorithms based on market data and sentiment analysis
- We have been successfully trading the most competitive traditional asset classes (equities, futures, options) for over 10 years
- We will deliver on time. Our product will be profitable, fast and reliable. Our track record testifies to that

TIMELINE

- **May 2018** – Alpha. 2 fully-automated profitably trading strategies
- **August 2018** – Beta. 3 fully-automated profitable strategies. Third-party users (pre-sale participants) onboarded
- **October 2018** – Platform public launch. Fully-automated strategies for exchanges with over 50% of the total trading volume
- **H1 2019** – Fully-automated strategies expanded. Trading signals for manual and semi-automated trading added
